Thursday, 29 April 2010, 6 pm

### **Piety and Pleasure, Youth, Sexuality and Moral Authority in the Southern Suburb of Beirut**

Prof Lara Deeb (Scripps College, USA)

All lectures will start on time, *sine tempore*.

This lecture series explores the impact of processes of globalization on local articulations of gender. It aims at revisiting the relations between these two – by now classical – fields of social science research by bringing together current perspectives from anthropology, history and Islamic studies. Presenting state-of-the-art research on Africa, Asia and the Middle East, the lectures will investigate ways in which globalization processes reconfigure gender norms and relations, as well as gendered spheres of action, in particular local settings.

Concept and organization:  
Dr Marloes Janson and  
Dr Katharina Lange
