

# THINKING THE RE-THINKING OF THE WORLD

Decolonial Challenges to the Humanities and Social Sciences from Africa, Asia and the Middle East

*Edited by Kai Kresse and Abdoulaye Sounaye*

As far too many intellectual histories and theoretical contributions from the 'global South' remain under-explored, this volume works towards redressing such imbalance. Experienced authors, from the regions concerned, along different disciplinary lines, and with a focus on different historical timeframes, sketch out their perspectives of envisaged transformations. This includes specific case studies and reflexive accounts from African, South Asian, and Middle Eastern contexts. Taking a critical stance on the ongoing dominance of Eurocentrism in academia, the authors present their contributions in relation to current decolonial challenges.
